

An earlier paragraph explains our experimental setup.

We compare our single-view estimator to the off-the-shelf UmeTrack baseline [11], which

Method	MPJPE	pick up	put down	Accuracy
UmeTrack	32.91	41.0	41.5	50.3
SVEgoNet	21.92	67.1	57.7	54.7

Table 5. Evaluation of action classification from hand poses.

pick up put down position remove screw unscrew

Figure 6. Confusion matrices of verb classification.

was used to provide the original annotations.
Our classifier improves the action recognition accuracy of hand poses estimated with UmeTrack.
Additionally, we present classification confusion matrices and discuss the remaining errors.
